Adam Rogers, CBE

EXPERIENCE

November, 2017 – Present

Forensic Analyst

Forensic Services Group

Complete Discovery Source, New York, NY

I am a computer forensic and eDiscovery professional of a growing forensic services group. My main duties include complex data collections, computer forensic investigations and the training of team members in the use of forensic and eDiscovery software / hardware solutions.

Additionally, I provide consulting services in the areas of forensic data collection, data analysis, and eDiscovery best practices.

06/2015 – 11/2017

Computer Forensics Engineer

DTI Global/Epiq – New York, New York

- Conducted offline and live forensic collections of ESI which included web mail, file servers, PC, Macs, smart phones, and tablets
- Crafted in depth company-wide documentation detailing collection procedures
- Updated, tracked, and stored digital evidence on a daily basis
- Worked hand in hand with clients to understand their point of view in order to better explain challenges and difficulties they face within the e-discovery process
- Conducted forensic examinations of terminated employee's hard drives using Encase and FTK
- Recovered data from damaged hard drives using a variety of forensic tools and techniques
- Mentored and trained team members in both process and techniques
- Managed and completed on-site acquisitions and divestitures leading teams to collect data from various sources including file servers, PC, Macs, smart phones, and tablets
- Developed excellent analytical and problem-solving skills. Able to perform efficiently and effectively working either independently or in a team environment. Consistently met deadlines, quality and performance standards

COMPUTER SKILLS

- Certified Blacklight Examiner (CBE)
- Proficient in the use of various computer forensic & security tools including Blacklight, FTK, Cellebrite, Paraben, Oxygen, EnCase, Aid4Mail, Axiom, and CAINE.
- Operating Systems: Windows, OSX
